Close contacts should not work/visit/attend any highest risk settings* for 10 days from last exposure, unless required for critical work shortages and as per direction from their workplace. Close contacts who previously tested positive for COVID-19 in the last 90 days (based on rapid antigen test or PCR test) are not required to isolate and can attend work in highest-risk setting, if they are symptom free.

- If an individual who lives, works, attends, volunteers or is admitted in any of the highest risk settings has symptoms of COVID-19, they should self-isolate immediately, seek testing and notify their workplace.

Follow the instructions below, unless directed otherwise by KFL&A Public Health, if you are a close contact of someone who tested positive for COVID-19 or someone with COVID-19 symptoms

<table>
<thead>
<tr>
<th>Does the COVID-19 positive/symptomatic person live with you?</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>YES</strong></td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td>Do you have <strong>COVID-19 symptoms</strong>?</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>YES</strong></td>
</tr>
<tr>
<td><strong>Self-isolate immediately for at least 5 days (if fully vaccinated or under 12)</strong> or 10 days (if not fully vaccinated or immunocompromised) after symptom onset and until you have no fever and other symptoms are improving for 24 hours (or 48 hours for gastrointestinal symptoms). Get tested if eligible and follow the guidance for cases.</td>
</tr>
<tr>
<td></td>
</tr>
<tr>
<td><strong>NO</strong></td>
</tr>
<tr>
<td><strong>Self-monitor for symptoms for 10 days after your last exposure.</strong> Report your exposure to your employer and follow any work restrictions. If you develop symptoms, get tested if eligible and self-isolate immediately.</td>
</tr>
</tbody>
</table>

If you do not meet the below criteria you must self-isolate for the same amount of time as the positive/symptomatic person. If any of the following apply to you, you do not need to self-isolate**:

- You have previously tested positive for COVID19 in the last 90 days
- You are 18+ and boosted
- You are under 18 years old and are fully vaccinated

If you develop symptoms, continue/start to self-isolate and get tested if you are eligible. Follow the guidance for cases.

If anyone else in your household develops symptoms, if you are isolating and still have no symptoms then you should extend your self-isolation until the newly symptomatic person has finished isolating.

**Wear a well-fitted mask in public, physical distance and maintain other public health measures for 10 days following your last exposure if leaving home. You should NOT visit or attend work in any highest risk settings and not visit individuals who may be at higher risk of illness (i.e. seniors or immunocompromised) for 10 days after your last exposure.
Next Steps

How to get your COVID-19 test results

• Your test result should be available within a few days.
• Visit covid-19.ontario.ca and click on “check your lab results”.
• If are unable to access your results, please contact your family physician.
• If you do not have a Family Physician please contact the provider who performed the test.
• If you were tested by:
  ◊ KHSC Assessment Centre,  
    email: covid19assessmentcentre@kingstonhsc.ca  
    or call: 613-544-3400 dial 1 and extension 4204  
  ◊ LACGH call: 613-354-8254  
  ◊ Pharmacy, please contact the Pharmacy where you were tested  
  ◊ Family Doctor, please contact your Doctors office  
• KFL&A Public Health will only receive a copy of your result if it is positive.

More about COVID-19

• If you have been diagnosed with a chronic diseases like diabetes, heart or lung disease, or if you are 70 years of age or older, you are at greater risk for more severe illness.
• It is important to monitor your symptoms. If your symptoms are worsening and you are concerned, contact Telehealth Ontario at 1-866-797-0000 or your health care provider or book an appointment at an assessment centre for further assessment (an appointment does not guarantee you will be tested).
• If you need urgent medical attention, for example, if you have chest pain, shortness of breath, or have difficulty breathing, call 9-1-1 and tell them you have tested positive for COVID-19 or if you have symptoms compatible with COVID-19.
