Have you been identified as a close contact of someone who tested positive for COVID-19 or someone with COVID-19 symptoms?

For 10 days after your last exposure:

- Self-monitor for symptoms. Self-isolate immediately if you develop any symptoms and seek testing if eligible.
- Wear a well fitted mask in all public settings.
- Avoid non-essential visits to anyone who is immunocompromised or at higher risk of illness (e.g., seniors).
- Avoid non-essential visits to highest risk settings such as hospitals and long-term care homes.

Report your exposure to your workplace and follow any workplace policies.

Employees working in high-risk settings who have had a COVID-19 exposure should speak with their employer to report their exposures and follow their workplace guidance for return to work.
